KIGS CH44 LAC in residential accomodation	12.6	14.7	Red	21.76%	15%	104	478	21.16%	15%	19.24%	15%	Q4 2011/12	The number of children in residential placements is at it's highest over the year. This includes secure units, health establishments, parent assessment units and residential schools. The need for these placements is closely monitored and is associated with specific requirements of the child, and not a lack of residential resource in-house. There has been a reduction in the number of residential placements owned by the Local Authority with the closure of one child care unit. There is an ongoing review of the residential provision for short breaks to children with disabilities, with a proposal to close one of two units and provide alternative support. The fostering strategy is still ongoing and the demand for IFAs continues to rise with a further increase of children in care requiring family placements.
