Agenda Item 6

DONCASTER METROPOLITAN BOROUGH COUNCIL

HEALTH AND WELLBEING BOARD

THURSDAY, 17TH JANUARY, 2019

A MEETING of the HEALTH AND WELLBEING BOARD was held at ST CATHERINE'S HOUSE, BALBY on THURSDAY, 17TH JANUARY, 2019, at 9.30 am.

PRESENT:

Vice-Chair - Dr David Crichton, Chair of Doncaster CCG (In the Chair)

Councillor Nigel Ball	Portfolio Holder for Public Health, Leisure & Culture
Councillor Nuala Fennelly	Portfolio Holder for Schools, Children & Young People
Councillor Cynthia Ransome	Conservative Party Representative
Dr Rupert Suckling	Director of Public Health, Doncaster Council
Damian Allen	Director Of People (DCS/DASS) Doncaster Council
Jackie Pederson	Chief Officer, Doncaster CCG
Steve Helps	Head of Prevention & Protection, SYFR
Richard Parker	Chief Executive, Doncaster Bassetlaw Teaching Foundation Trust
Rosie Johnson	Director of Workforce & OD and Deputy CEO, RDaSH
Mark Douglas	Chief Operating Officer, DCST
Lucy Robertshaw	Assistant Director, DARTS

Also In Attendance:

Dr Victor Joseph	Public Health Consultant
Dr Shazia Ahmed	Public Health Specialist
Helen Conroy	DMBC Public Health Consultant
Stephen Emmerson	Doncaster Clinical Commissioning Group
Andy Pattinson	Senior Manager, Strategy and Performance

37 WELCOME, INTRODUCTIONS AND APOLOGIES FOR ABSENCE

Apologies for absence were received from the Chair, Councillor Rachael Blake, Kathryn Singh, (Rosie Johnson deputised), Steve Shore, Laura Sherburn, Peter Dale, Paul Tanney, Superintendent Shaun Morley and Paul Moffat (Mark Douglas deputised).

38 CHAIR'S ANNOUNCEMENTS

The Vice Chair, Dr Crichton conveyed the Board's congratulations to Richard Parker, Chief Executive of Doncaster & Bassetlaw Teaching Hospitals NHS Foundation Trust, on being awarded an OBE for services to sustainable care in the Queen's New Year's Honours List.

39 PUBLIC QUESTIONS

There were no public questions asked at the meeting.

40 DECLARATIONS OF INTEREST, IF ANY

There were no declarations of interest made at the meeting.

41 MINUTES OF THE MEETING OF THE HEALTH AND WELLBEING BOARD HELD ON 15TH NOVEMBER 2018

The Board's attention was drawn to the Public Question at the last meeting, and those members who had not yet provided Mr Tim Brown with the relevant information on Workforce Diversity were urged to do so.

RESOLVED that the minutes of the meeting of the Health and Wellbeing Board, held on Thursday 15th November, 2018, be approved as a true record and signed by the Chair.

42 REPORT FROM HEALTH AND WELLBEING BOARD STEERING GROUP AND FORWARD PLAN

Members considered a report that provided an update with regard to the work of the Steering Group in delivering the Board's work programme, and also provided a draft Forward Plan for the Board to work to.

A number of updates were provided to Board on the following issues that had been discussed by the Steering Group since the last formal meeting, with some focus placed on the following:

The NHS Long-term Plan

In terms of this, the Board were informed that work was now being undertaken, in order to ensure that a local plan for 2019/20 was published by April 2019, with a 5 year plan available by autumn. A joint strategy was being developed and more information on this would be available at a future meeting.

Gambling

With regard to gambling, it was noted that greater support was now being made available to younger gamblers, and the Young Gamblers Education Trust, was offering training to ensure that staff dealing with young gamblers had the adequate tools to address the issue.

Well North / Well Doncaster

The Annual Report was attached to the agenda papers which provided an update of all work undertaken during 2017/18. Progress was being made, and the Place Plan was being embedded to bring about further improvements.

New Mental Health Support in schools and colleges, with faster access to NHS Care

This was an issue on which a number of comments were made during the course of the discussion, with Members welcoming this support. Councillor Fennelly particularly, was pleased to see this as she commented that it seemed that mental health problems were emerging at an early age more and more, and it was imperative that there was adequate support in schools. The Board were informed that Doncaster had driven the national agenda with regard to this issue and were looking to build on this success more and more. There were currently 7 CAMHS workers and with this initiative there would now be an additional 14 which was a huge support to children and young people.

The minutes of the SY&B Shadow Integrated Care System Collaborative Partnership Board Meeting held on 19 October, 2018 were attached for the Board's information, along with a

Forward Plan for the Health and Wellbeing Board that plotted in the different work streams they would be looking at in the coming year, and would be updated as and when required.

RESOLVED that the Board noted the update received from the Steering Group and agreed the Forward Plan attached at Appendix A to the report.

43 HEALTH AND WELLBEING BOARD OUTCOMES FRAMEWORK 2018-21: CANCER UPDATE

Further to discussions held at November's Health and Wellbeing Board, a paper was presented to the Board along with a presentation, which provided an update on the work to address the challenge of cancer within the Borough.

Cancer, as a disease, was increasing year on year and for anyone born after the year 1960, it would affect 1 in 2 people, with over 200 different types of cancers affecting individuals, their lives and their families, in differing ways with varying outcomes.

Whilst the number of people affected by cancer was higher than ever, Members noted that the number of people surviving, was also higher, with more people being diagnosed at an earlier stage with upwardly improving outcomes. The Board were informed that there was a much greater awareness now of factors which could contribute to the cause of cancer, including smoking, obesity, alcohol, as well as living healthy lifestyles, and avoiding sun damage or other carcinogens. Additionally, there were preventative measures such as the HPV Vaccine offered to young girls which could offer protection against illnesses that could later change into cancer.

Whilst screening was a relatively new initiative, and the tests were not undertaken specifically to detect cancer, they could be used to diagnose changes that may lead to cancer at a later stage and were therefore a useful tool.

There was a lot of work being done across Doncaster, and the 'Be Cancer Safe' scheme was doing a lot of work in raising awareness in people with regard to noting signs and symptoms, as well as highlighting the access to screening which would increase the number of people diagnosed at an earlier stage. Additionally, there were currently 2811 cancer champions across Doncaster who would use their experience and knowledge to support those with Cancer and it was hoped that more would be recruited in the future.

New ways of working were being developed all the time, with different pathways created and explored, and improvements continually being made and the NHS Long-term Plan had a number of actions it was working towards including the following:-

- 75% diagnosis at an early stage from 2028
- Rapid diagnostic centres
- Lung health checks and low dose CT scans
- Faster diagnosis, with 28 day targets
- Genome testing for all cancer patients, starting with children
- New radiotherapy proton beam facilities

Following what was a very informative and in-depth presentation, the Chair invited any questions or comments from the members of the Board. A brief discussion ensued where Members asked for any clarity on any of the points, figures or statements contained within the documents presented.

RESOLVED that the Health and Wellbeing Board note the report and accompanying presentation with regard to Cancer Updates

PREVENTION CONCORDAT FOR BETTER MENTAL HEALTH AND MENTAL HEALTH ADULTS IMPROVEMENT PLAN

Members considered a presentation that proposed the bringing together of a number of actions which would look to improve mental health services for people in Doncaster. The proposed Improvement Plan was not a replacement of the individual plans currently in place, but complementary to, and would bring together a more joined up approach of working over a five year period.

The work undertaken would look to provide patients with the tools for better self-management, earlier identification of their deteriorating mental health and the access to support for coping with, and recovering from mental illness.

The Prevention Concordat for Better Mental Health was a national consensus statement that would look to transform the health system by increasing the focus on prevention of mental health. By ensuring that there was more joined up way of working and commissioning, it would allow for a more holistic approach, which would not only focus on people's needs but also recognise the determinants that affected mental wellbeing. The seven points of the Concordat were outlined in depth during the course of the presentation, with the Board asked to support this by endorsing the concordat through the agreement and signing of it by the Chair or Director of Public Health.

The Plan organised across several themes, which aimed to make it accessible, concise and easy to read:-

- Living Well – Community led support and low level early intervention
- Access to appropriate services
- Holistic Care and Support
- People with Complex / bespoke needs
- Suicide Prevention

There would also be information relating to outcomes and needs, and governance and assets aspects, all of which would be integral to the delivery of the Mental Health Improvement Plan. The Plan would be a live document and would be updated on a regular basis to ensure it was developed and monitored accordingly.

Members were supportive of the approach, particularly in relation to the elements relating to children and families, as there often proved to be gaps in providing the support needed to children coming from troubled homes. It was a piece of work that would transition gradually, and although a lot of work was still needed the Board was hopeful this would happen with greater joined up working. Members commented that the focus on prevention was key, as it was important to look at the roots of mental health and they were continually learning from the work carried out in relation to the complex lives agenda in working towards more successful ways of dealing with family rooted issues.

There was acknowledgement that whilst prevention was key, the bigger picture was a huge challenge and joint commissioning and better partnership working was needed in order that the mental health agenda could be driven forward.

Members were happy to support the Concordat and Mental Health Improvement Plan, and were assured that their concerns would be noted, and as the document would be a live document, it could be adapted and moved forward when changes were needed.

RESOLVED that the Board endorsed the Better Mental Health Improvement Plan for Adults and support the Director of Public Health and/or the Chair of the Health and Wellbeing Board to sign the Prevention Concordat for Better Mental Health on behalf of the Health and Wellbeing Board.

A presentation was given by Dr Victor Joseph and Dr Shazia Ahmed, which gave an overview of the progress made on addressing health protection matters in Doncaster.

Health Protection was a key issue and one of the main contributing factors to improving the long term health of the people in Doncaster by ensuring services were in place to prevent a number of different illnesses and diseases, as well as ensuring that environmental problems such as air quality were addressed in order to alleviate issues that could later lead to serious health problems.

A number of key actions were highlighted during the course of the presentation in order to provide more information to Members, these being as follows:-

Air Quality:-

There had been a piece of joint work undertaken between Doncaster Council's Public Health and Environmental Health, with the Air Quality Steering Group working on a number of issues, which resulted in the production of a refreshed Air Quality Action Plan.

Seasonal influenza:-

It was reported that analysis had been undertaken by the Public Health Team to determine how the uptake of flu vaccination could be improved in order to protect the health of the residents of Doncaster. It was noted that there had been a targeted drive of the flu vaccination within Doncaster's care homes and this had helped towards the achievement of 77% of Doncaster's population living in care homes taking up the vaccine offer. The target set nationally, was currently 75%, so in terms of that, Doncaster had shown good progress. However, work was still being undertaken in order to ascertain the differences between people living in different areas across the Borough.

MMR Vaccine:-

Analysis of the uptake of the MMR vaccine had been carried out across different areas and GP Practices across Doncaster in order to identify the areas where the uptake of the second dose was lower in order to address this problem. This would look to alleviate potential outbreaks or epidemics of Mumps, Measles or Rubella, all of which could result in serious health complications.

Tobacco Control:-

This was a key area of work for Public Health, and the vision was to eventually create a Smoke free generation in Doncaster. This however, was a long-term goal, and currently the target was looking more specifically to reduce smoking rates from 19.8% to 10% or less by 2022. A number of key themes were being worked on to achieve this, with the introduction of smoke free environments, training on the risks of smoking, Support for smokers trying to stop and the effective enforcement of smoking in smoke free places and the sale of illicit substances which were both cheaper and more harmful.

The Board was also provided with updates in terms of screening and immunisation, and a number of figures were provided on these, as well as the issues raised above, for Members to consider.

Following the presentation, the Chair afforded Members of the Board the opportunity to ask any questions of the officers relating to the issues raised.

One of the main areas of discussion raised by the Board was in relation to tobacco control and the aim to reduce smoking rates. There was the need to ensure that the message across all

health partners was the same, with consistency applied. It was welcomed that a smoke free Doncaster was being worked towards. It was noted that the frontage of the hospital was being changed to a smoke free area, and although patients and visitors would be able to vape, any smoking would be enforced.

The Board welcomed the work being undertaken and in particular, were pleased to see the improvement in the uptake of vaccinations, particularly seasonal influenza. However, there was still room for improvement and the offer could potentially be opened to a wider audience, with people such as carers and home workers targeted in order to widen the net of people protected.

The Chair thanked the Officers for the presentation, and welcomed the update, although it was noted that it would have been helpful to see the report in its entirety. However, the progress that had been reflected upon was pleasing, although a point to note, it was felt, was in relation to screening. Although it was classified as 'green', this figure had dropped, and it was important that it be acted upon before it fell into 'amber' in the future.

RESOLVED that:-

- 1) The Health and Wellbeing Board note the progress made on addressing health protection matters in Doncaster;
- 2) The recommendation to continue to work with local partners and to monitor immunisation update, in particular seasonal influenza vaccinations and MMR, be endorsed;
- 3) The work of the Doncaster Active Travel Alliance be endorsed, acknowledging the importance of encouraging residents to cycle and walk short journeys;
- 4) The work on tackling the reduction of smoking in Doncaster be endorsed; and
- 5) The Health and Wellbeing Board endorse the work undertaken in monitoring and reporting on progress with regard to broader health protection functions in the Borough.

46 DONCASTER SAFEGUARDING CHILDREN BOARD ANNUAL REPORT 2017-18

The Health and Wellbeing Board considered the Doncaster Safeguarding Children's Board (DSCB) Annual Report for 2017/18. The report covered the work undertaken by the Board for the 2017/18 financial year and looked to identify any emerging themes for the first quarter of 2018/19.

As well as the Health and Wellbeing Board, it was noted that the report would be considered by the Mayor of Doncaster and the Chief Executive, as well as the Schools, Children and Young People Panel and the Children and Families Strategic Partnership Board who would all look to hold the DSCB to account when and where required.

The report had been prepared by John Woodhouse, the new Chair of both DSCB and the Doncaster Adults Safeguarding Board (ASB) along with Rosie Faulkner, Board Manager. The report produced was now a lot more concise and streamlined, concentrating on the key points that the readers needed to know. Points mentioned included the following:-

- Concerns relating to smoking in pregnancy;
- Suicide in Young People;
- Self-Harming and Mental Health Issues in Children and Young People;
- Criminal Exploitation
- Child Protection and CSE
- Links between the DSCB and the ASB

A discussion followed on a number of the issues raised within the presentation, whereby the Board discussed these points in greater depth including what was being done in all elements of these points, this being prevention, protection, and future safeguarding. There were Sub-Groups in place that would look at a number of issues and good work had been undertaken across the Board's remit with many positives identified. For example, the Child Sexual Exploitation Group had now widened its remit to incorporate criminal exploitation, and were building on the good work they had done to date.

A number of key areas identified for the DSCB to look at in the coming year hoped to build on the progress made to date. These were outlined on page 66 of the report and would allow partners to remain focussed and work on improving practice.

The Health and Wellbeing Board noted that the recent Ofsted inspection into Children's Services judged the service to be good, which was clear evidence of the good work being undertaken to improve services for children, and whilst there were still many challenges ahead, these were offset by the many improvements that had been made.

RESOLVED that the Health and Wellbeing Board note the key findings from the Doncaster Safeguarding Children's Board.

47 DELIVERING INCLUSIVE GROWTH THROUGH ANCHOR INSTITUTIONS

The Board received a paper that proposed to develop the role of Anchor Institutions to develop Inclusive Growth in Doncaster, which was a result of the development of Doncaster's new Inclusive Growth Strategy. This strategy had six rivers for growth and looked to capture core parts of the Doncaster Growing Together Plan that was already influencing inclusive growth. Therefore, this would look to improve the quality of place, improve skill, support business growth and ensure opportunity reached the borough's most vulnerable people

For each driver the role of Doncaster's anchor institutions is highlighted and work was now underway to develop Doncaster's approach in order to maximising the impact of anchor institutions on inclusive growth by creating wider social value through their activities. One aspect of this was to utilise their purchasing power and commissioning processes in order to drive growth at a local level.

Following the presentation of the paper, the Board were invited to comment on the proposals and put forward any suggestions of how this could be taken forward.

The Board welcomed the Paper and it was felt that it was an issue that was certainly at the forefront of people's minds and could be built upon. The appointment of Hall Cross School as England's first 'Foundation School for Health' was highlighted as its contribution to this issue could be huge. This would see the school working with the local NHS provider to develop opportunities for students who wished to pursue a career in the health service.

A number of other positive points were noted as part of the discussions that ensued, with Dr David Crichton and Jackie Pederson highlighting the proposal to appoint a workforce lead in terms of the 'Grow your own' work being undertaken, which would look to connect with local communities and promote the breadth of careers available within the health service.

Additionally, the potential of being linked to the teaching hospital also opened up more avenues for the development, and transfer of knowledge and skills.

A number of other potential areas to explore were highlighted, including utilising the Apprenticeship Levy, as there was the option that this could be used as a mechanism to enable Anchor Institutions by increasing its potential impact.

The Chair proposed that the next step in terms of moving this agenda forward, would be to present the proposals with regard to the roles of the anchor institutions, to the Doncaster Integrated Partnership, in order to allow for informal and dedicated discussions.

RESOLVED that the discussions held by the Board with regard to the proposal to promote inclusive growth through anchor institutions be noted.

To the Chair and Members of the HEALTH AND WELLBEING BOARD

REPORT FROM THE HEALTH AND WELLBEING BOARD STEERING GROUP AND FORWARD PLAN

EXECUTIVE SUMMARY

1. The purpose of this report is to provide an update to the members of the Health and Wellbeing Board on the work of the Steering Group to deliver the Board's work programme and also provides a draft forward plan for future Board meetings.

EXEMPT REPORT

2. N/A

RECOMMENDATIONS

3. That the Board RECEIVES the update from the Steering Group, and CONSIDERS and AGREES the proposed forward plan at Appendix A.

WHAT DOES THIS MEAN FOR THE CITIZENS OF DONCASTER?

4. The work programme of the Health and Wellbeing Board has a significant impact on the health and wellbeing of the Doncaster population through the Health and Wellbeing Strategy, the Joint Strategic Needs Assessment, system management and any decisions that are made as a result of Board meetings.

BACKGROUND

5. At the first full Board meeting on 6th June 2013, Board members agreed that there would be a Health and Wellbeing Officer group to provide regular support and a limited support infrastructure to the Board. In March 2016 this support was changed to a steering group.

The Steering group has had one meeting since the last Board in January 2019. It is refocussing to ensure progress on the Health and Wellbeing Strategy and key Board priorities including health inequalities, loneliness/social isolation, oral health, the areas of focus (alcohol, obesity, dementia, and mental health) and prevention. Key updates include:

Arts and Health

The Arts & Health Project Board have secured investment for a sequence of pilot programmes to test how Arts on Prescription can work for Doncaster. The pilots focus on three health priorities:

1. Improving wellbeing of adults with long term mental health conditions
2. Improving levels of physical activity in older people
3. Improving wellbeing of adults living with dementia and their carers

National evidence demonstrates that arts and culture have a successful role to play in addressing these health priorities. The focus for our pilots is to find the most effective models for Doncaster.

Partners from Arts & Culture and Health & Social Care have worked closely together to design the pilots and engage academic partners to evaluate success. Investment has come from Doncaster CCG and Public Health matching funds from Big Lottery, Spirit of 2012, Sport England and Arts Council England.

Activity began last autumn with Dance On, a borough wide programme using dance to improve physical activity and reduce falls, specifically targeting older women. Dance On is part of a national pilot with One Dance UK, Yorkshire Dance and Leeds University.

Over the spring and summer this year further pilots are beginning in Edlington, Askern and Mexborough with artists and other professionals from Cast, darts and Heritage Services working alongside primary and community care practitioners to support adults with long term mental health conditions.

Our aim over the next two years is to gather the evidence and understanding needed to create scalable, sustainable models which can make arts on prescription available to residents across the borough. This is an ambitious target and Doncaster is one of a very few areas in the UK to be testing arts on prescription at this scale and breadth.

Research City

On the 8th February Doncaster hosted Prof Chris Whitty the Deputy Chief Medical Officer and chief scientific advisor to the Department of Health and Social Care together with his team. Prof Whitty was joined by the representatives from the Yorkshire and Humber Clinical Research Network and key local researchers. Over the course of the day we showcased work on offender health, community research approaches including adult social care, the opening of Community Clinical Research Facility at Rotherham Doncaster and South Humber NHS Foundation Trust (RDaSH). The visit showed how Doncaster was ready to undertake a broad range of health and social research. The next development is to undertake a research prioritisation exercise and commence the process of submitting research bids either as part of a consortium or on our own.

Recovery City

As a result of the presentation at the Board last year work has continued on Recovery Cities. This has included support to South Yorkshire Police on their approach to addressing Novel Psychoactive Substances (NPS) along with working closely with colleagues in Gothenburg and Vienna. The April Health and Wellbeing Board workshop will focus on this agenda and we will look to host an international learning event in August, immediately before the Recovery Games.

South Yorkshire and Bassetlaw Shadow Integrated Care System Collaborative Partnership Board

There has been no meeting since the last Health and Wellbeing Board.

Forward Plan

The Forward Plan for 2019 is presented for debate, discussion and agreement.

OPTIONS CONSIDERED

Health and Wellbeing Board**

Date: 14.3.2019

Subject: Dementia Deep Dive

Presented by: Stephen Emmerson – Head of Strategy and Delivery, DCCG
Louise Robson - Public Health Theme Lead (Working Age and Healthy Lives), PH, DMBC

Purpose of bringing this report to the Board		
Decision		
Recommendation to Full Council		
Endorsement		
Information		√
Implications		Applicable Yes/No
DHWB Strategy Areas of Focus	Substance Misuse (Drugs and Alcohol)	No
	Mental Health	No
	Dementia	Yes
	Obesity	No
	Children and Families	No
Joint Strategic Needs Assessment		No
Finance		No
Legal		No
Equalities		No
Other Implications (please list)		No

How will this contribute to improving health and wellbeing in Doncaster?
By raising awareness, reducing stigma and promoting prevention of Dementia. By diagnosing well, improving pathways and ensuring effective care planning will ensure people with dementia and their carers can receive the right post diagnostic care and support to ensure people can live well with dementia. If people with dementia need to access urgent and emergency care, these service are respondent to their needs.
Recommendations
The Board is asked to:- Acknowledge the progress made in the area of focus and the areas for future development.

**Doncaster
Health and Wellbeing Board**

Date: 14th March 2019

Subject: Learning Disability and Autism Strategy

Presented by: Jayne Gilmour, Interim Strategic Lead

Purpose of bringing this report to the Board	
Decision	
Recommendation to Full Council	
Endorsement	
Information	Yes

Implications		Applicable Yes/No
DHWB Strategy Areas of Focus	Substance Misuse (Drugs and Alcohol)	
	Mental Health	Aligns
	Dementia	Aligns
	Obesity	
	Children and Families	Yes
Joint Strategic Needs Assessment		Contribute to JSNA, which needs to include Autism
Finance		Should enable a clearer focus on how available resources are jointly utilised and enable redirection of funding to transform services where appropriate.
Legal		N/A
Equalities		Should address health and other inequalities
Other Implications (please list)		Will support the Joint Commissioning strategy

How will this contribute to improving health and wellbeing in Doncaster?

The strategy and delivery plans will ensure that there are clear joint priorities for improving the health and wellbeing of people with Learning disabilities and people with Autistic Spectrum conditions. This will include improving access to health care, health and wellbeing services and a broader roll out of reasonable adjustments including universal services.

Recommendations

The Board is asked to:-

- | |
|--|
| <ol style="list-style-type: none">1) Note the progress being made with development of the Strategy and to provide feedback as part of the consultation process;2) Consider at a later date the findings of the Autism Self- Assessment Framework, and consider specific reference to Autism in the next JSNA. |

How will this contribute to improving health and wellbeing in Doncaster?
<p>The Director of Public Health (DPH) has a statutory duty to write a report on the health of the local population and the authority has a duty to publish it (section 73B (5) & (6) of the 2006 Act, inserted by section 31 of the 2012 Act). The content and structure of the report is something to be decided locally.</p> <p>The 2018 Doncaster Director of Public Health Annual Report is the fourth authored by Dr Rupert Suckling.</p>

In an increasingly digital world, this year the delivery of the main report is as a short video <https://youtu.be/SghEWPqi4Jg> which will be made available online, the attached PDF version is intended to accompany the video.

This is the first Annual Report to focus on a specific topic and the topic is 'No health without mental health'. As a society it is important that everyone understands what is meant by mental health and is able to talk about it.

For this Annual Report mental health or mental wellbeing is defined as the combination of feeling good and functioning effectively. Feeling good includes not only the positive emotions of happiness and contentment, but also other emotions as interest, engagement, confidence and affection. Functioning effectively (in a psychological sense) involves the development of one's life, having a sense of purpose such as working towards valued goals, and experiencing positive relationships.

Three key factors impact on mental health, living circumstances, personal resources and the activities where energy is focussed. This report concentrates on the activities where energy is focussed and by focusing on the 'Five ways to Wellbeing' people can create better mental health for themselves, their families and their friends.

The Annual Report does not focus on living circumstances, personal resources or mental health services for either children and young people, or adults with mental illness as these issues, services and strategies have all been the subject of local Overview and Scrutiny reviews in the last year. Locally most mental health services are commissioned by Doncaster Clinical Commissioning Group and provided by Rotherham Doncaster and South Humber NHS Foundation Trust. Further information about these services is available through the individual organisations.

Finally this report provides updates on progress against the five building blocks for good health and wellbeing identified in 2017's report. These are:

- Give every child the best start in life
- Make good growth our watchword for economic development
- Improve healthy life expectancy through preventing disability
- Tackle unfairness and health inequalities
- Build a sustainable and resilient borough

Recommendations

The Board is asked to:-

NOTE the report and consider how the recommendations can be taken forward in future strategy and delivery plans.

Foreword and Introduction

Welcome to my fourth Annual Report as Director of Public Health for Doncaster Council.

In an increasingly digital world, this year I've chosen to deliver my main report as a short video which is available online at www.doncaster.gov.uk/phannualreport. This PDF version is intended to accompany the video and I hope you'll enjoy both.

This is the first of my reports to focus on a specific topic and the topic is 'No health without mental health'. Yet mental health is still seen by many as a taboo subject despite the fact that we all have mental health! As a society it is important that everyone understands what is meant by mental health and is able to talk about it. By mental health or mental wellbeing I'm referring to the combination of feeling good and functioning effectively. Feeling good includes not only the positive emotions of happiness and contentment, but also other emotions as interest, engagement, confidence and affection. Functioning effectively (in a psychological sense) involves the development of one's life, having a sense of purpose such as working towards valued goals, and experiencing positive relationships.

Three key factors impact on our mental health, our circumstances, our personal resources and the activities we focus our energy on. Our circumstances and where we live makes a difference to our mental health whether it's the quality of our schools, jobs, housing, urban design or availability of green space. Our personal resources including our physical health are also important in helping us be resilient to life's ups and downs. Although we may have less control of our circumstances or our personal resources what is clear is that through what we focus our energy on we can create better mental health for ourselves, our families and our friends. The best way to do this is to adopt the 'Five Ways to Wellbeing'.

As you will see much of what we can do to create mental health requires schools, businesses and statutory services to behave differently. In fact statutory services will need to change from doing 'to' or 'for' people and become services that work 'with' people and encourage people to solve problems 'by' themselves.

I have deliberately focused on the five ways to wellbeing and not addressed our circumstances, our personal resources or mental health services for either children and young people or adults with mental illness as these issues, services and strategies have all been the subject of local Overview and Scrutiny reviews in the last year.

Locally most mental health services are commissioned by Doncaster Clinical Commissioning Group and provided by Rotherham Doncaster and South Humber NHS Foundation Trust. Further information about these services is available through the individual organisations.

In creating this report I am grateful for the help of a number of colleagues. In particular I would like to thank Andy Maddox, Vanessa Powell-Hoyland and Tom Smith from Doncaster Council, Sue Redfern from St Leger Homes, and Joan Kee and Marie McClay from Age UK, who took part in the video interviews. I'd also like to thank Steve Betts, Daniel Debenham, Steph Cunningham and Duncan Rynehart from the communications team for their valued input to the production of this report.

If you have any questions or comments about any aspect of the report please send them to me at: PublicHealthEnquiries@doncaster.gov.uk

Director of Public Health
Doncaster Council

The five ways to wellbeing

In the same way that it is widely acknowledged that eating five portions of fruit and vegetables should be part of a balanced and healthy diet, the five ways to wellbeing are recommended steps that everyone can build into their daily life to improve their mental health and wellbeing.

Mental health isn't just about the absence of mental illness, it's much more about life satisfaction, happiness, feeling worthwhile and having low anxiety. There are things we can do as individuals, families and communities that will help us create better mental health, so by keeping learning, connecting with others, being active, giving our time and taking notice we can all help ourselves and our families.

01 Learn

Learning and developing new skills can give a sense of achievement and a new found confidence.

Whilst many people will think of learning as something that results in a qualification, in reality we can all learn from every-day interactions with family, friends and others in our community.

Learning begins early in life with the first 1001 days of a child's life being the most important, this is when Doncaster children are increasing their readiness for school. However, with the nature of work changing it is important that we all take learning seriously throughout our lives. Learning is also a social activity and Doncaster is lucky to have a range of assets that we can draw on for learning.

60 Readers groups in Doncaster

It's a great social way to talk about what you enjoyed and learn about how people interpret stories differently.

Doncaster Libraries

Tom Wilcock – Doncaster Libraries

At Doncaster Libraries we've got a lot of fantastic groups set up that help local residents of all ages to learn.

To support with computer and internet skills we have an iPad and tablet club, and a computer basics class. The computer basics class does exactly what it says, it is designed for people who have never been on a computer and runs over a three-week period, at the end of which they are equipped with the skills and confidence to use a computer on their own, either at home or in the library. The tablet club is used as a drop-in session for all residents to ask any questions they might have about making best use of their tablet, it also encourages members to the group to support each other and meet new people.

We also facilitate around 60 readers groups in Doncaster, with each having between 4 and 15 members. In the groups every member reads the same book and then comes together three or four weeks later to discuss it. It's a great social way to talk about what you enjoyed and learn about how different people interpret stories differently.

514,504

visits to Doncaster Libraries

626,436

online visits to:
library.doncaster.gov.uk

There are so many health benefits linked to reading; it can reduce stress levels, prevent the onset of Alzheimer's and Dementia, and it can also help you live longer, who doesn't want that?

For younger children we hold rhyme time across the Borough, which as well as being fun helps to develop language and literacy skills. It's also got an important part to play in preparing them for school by teaching them to observe, interact, sit down and listen to stories as well as socialising with other children.

Like it or not, computers and coding are now becoming part of our daily lives and it's also part of the school curriculum. In Doncaster Libraries we're also giving children the opportunity to be one step ahead by learning how to code and learning how to integrate these skills into their daily lives.

OVER 400,000

02 Connect

Social isolation can have the same impact on our health as smoking 15 cigarettes a day.

In Doncaster we have an increasing focus on the importance of connecting people together and talking about how we're feeling. This was noted in the Doncaster Talks report where the two most important things for local people's health and wellbeing were highlighted as connection with others and being open to new experiences.

Tackling loneliness is a key priority for the Doncaster Health and Wellbeing Board working with local charities, groups and communities. The Your Life Doncaster website provides links to over 1,500 community groups and projects such as the Well Doncaster programme that began in Denaby in 2015 that are actively engaging communities to help build their own local links.

Well Doncaster programme in Denaby

Vanessa Powell-Hoyland - Well North Programme, Doncaster Council
Sue Redfern - St Leger Homes

Well Doncaster aims to reduce health inequalities and looks at how we can connect with communities by taking a different approach.

One piece of work that we've helped to develop is working with St Leger Homes on a project called Denaby Recycling which reuses furniture left in empty St Leger properties.

The programme started 12 months ago when it was noted that a number of new tenants were experiencing social isolation and didn't have enough money to buy furniture for their property. By Well Doncaster and St Leger working in partnership a new successful approach was developed. Previously any furniture or electrical equipment left in empty St Leger properties was thrown away, under the new approach all left items are now safety tested and made available for other tenants in the Denaby area to use.

This new approach has meant that residents have been able to pay their rent because they're not had to spend money on as many electrical items or furniture and as a result the quality of life they're now experiencing is far better. When a tenant of 17 or 18 years old moves into a house for the first

"The service is helping residents sustain their tenancies and improve their quality of life by recycling furniture and giving back out into the community."

"People of all ages in Denaby have been identifying 'what's strong' and building on that by creating places for people to meet."

time they may have their own pots or pans, but it's the bigger and more expensive items that St Leger can help them with, things like washing machines, fridge freezers, toasters and sofas.

One of the important things we know about supporting local communities is that it helps people to grow and develop. Over the last three years people of all ages in Denaby have been identifying 'what's strong' and building on that by creating places for people to meet, supporting community events and setting up small business with practical support from the Well Doncaster Team.

As the work in Denaby continues, the learning from the Well North programme is being expanded into other communities across the Borough, with four new wards selected to expand the reach of the programme; Edlington, Balby, Bentley and Stainforth. Each community has their own strengths and challenges and we are working with local people and organisations to understand how best to address these.

 Mental health disorders affect more than **1 in 4** of the population at any one given time.

Per year, mental health disorders cost the English economy an estimated

£105 billion

03 Be active

There are many reasons why physical activity is good for our bodies.

Everyone knows it is good for maintaining a healthy heart and strengthening our bones and muscles, but physical activity is also beneficial to our mental health and wellbeing.

We need to change the way we view physical activity so it is not seen as something we 'have to do', 'should do' or 'ought to do' for our health, but as something that we do because we personally understand its positive benefits to our wellbeing.

In addition to benefitting the health of the Borough, physical activity and sport also contributes significantly to Doncaster's economy:

£133m

of value created through a healthier population and savings to care costs.

£95m

per year directly through salaries and company profits.

£54m

worth of volunteering.

356

people take part in Sandall Park's weekly 5km run.

Get Doncaster Moving

Andy Maddox - Doncaster Council Leisure Services

In the past 12 months Doncaster has become one of 12 national Sport England Local Delivery Pilot sites and Get Doncaster Moving is one of our transformational projects for the Borough.

We all know that physical activity can help us: it helps in a number of ways by reducing heart disease and stroke, reducing cancer and type two diabetes, but being active also reduces depression and can improve our mental well-being.

In Doncaster one third of our population are classed as inactive, doing less than 30 minutes of physical activity each week. Through Get Doncaster Moving we intend to change that. The programme is designed across five themes of walking, cycling, dance, sports and parks/open spaces, and we are working with partners to improve the health of the Borough, both physically and mentally.

Through walking and cycling we aim to help people become more active, both as forms of transport and for recreation. We have invested in the Trans Pennine Trail which has seen a massive increase in the number of people cycling and walking in the area. We're also investing in a cycling circuit in Doncaster, creating a traffic-free environment where residents can enjoy riding a bike and seeing cycling competitions in action as Doncaster becomes a hotbed of cycling, shown by the Borough hosting stages of the Tour de Yorkshire in 2018 and the forthcoming UCI World Championships in 2019.

We're also aiming to deliver dance across all age groups, with a focus on both young and old in local communities, and recreationally parks and opens spaces are a very important to the programme as places where residents can enjoy being active. As the fifth element of the programme, sport, we're looking to invest in our facilities over the longer term and will be supporting local clubs and volunteers to grow the heart of our sporting population.

As well as being beneficial for mental and physical health, being active is also a key way to make the local population more aspirational and affluent, helping people to be more engaged in their local communities, more engaged in work and more engaged in education.

We want everyone to be active and to Get Doncaster Moving.

30 different play and advice sessions at the local family hubs each week

193,000

Doncaster residents have been given the opportunity to watch the Tour de Yorkshire race pass through their local community since its first visit in 2016.

04 Give

Research shows that our health and happiness can be directly linked to giving back to the community through volunteering and connecting with the people around us.

Volunteering and community action holds the power to transform a place and can positively influence the health and wellbeing outcomes of an entire population. It's also proven to help people overcome struggles with their mental and physical health and overall leads to happier and healthier lives.

Volunteering is already at the heart of our health and social care system. Volunteers who visit patients, run cafés, offer support groups and generally help people living with illness to feel better, are worth an estimated £700,000 a year (Kings Fund) to each individual NHS trust.

350,000

volunteering
hours are given
across Doncaster
each year

Volunteering in Doncaster

Joan Kee (volunteer), Age UK
Marie McClay, Age UK

Joan Kee is a volunteer at Age UK in Doncaster and helps people locally to get out and about which can make a big difference to their mental health, but has made a big difference to Joan too.

Joan started volunteering when her son suggested that she get out and about more. She called into the local library and that one step started her volunteering career! Joan then heard about Age UK and by volunteering with their Doncaster branch was able to take people to the library which in turn helped them to make new friends.

"I feel as if I've won the lottery when I get to hear their stories and I'm sorry that I couldn't have done this years ago. It's been such a pleasure helping others. I would advise anyone to try it."

"It's been such a pleasure helping others. I would advise anyone to try it."

Mental health disorders start at an early age and can have lifetime consequences.

Opportunities to promote and protect good mental health begin at conception and continue throughout the life-course, from childhood to old age.

"It's brilliant and I would advise anyone to give it a try. The people you are paired with become your friends."

Volunteers who generally help people living with illness to feel better are worth and estimated

£700,000

to each individual NHS trust.

Mental health disorders are responsible for the largest burden of disease in England – 23% of the total burden, compared to 16% for cancer and 16% for heart disease.

Mental wellbeing is associated with a wide range of improved outcomes in health, education and employment, as well as reduced crime and antisocial behaviour.

05 Take notice

Taking notice means actively paying attention to ourselves and the world around us.

Taking notice means both seeing what is going on outside us and being aware of what is happening inside our bodies too.

As part of the Doncaster Growing Together programme a wide range of improvements to local facilities are underway across the Borough, with the redesign of the train station, the creation of the Herten Triangle and work in progress on the development of the new cultural hub, set to replace the existing central library and art gallery in 2020 as part of the Urban Centre Masterplan. Work is also underway on refurbishing the Wool Market with the programme expected to be completed in Spring 2019.

In our parks there has been a lot of development in the past year too, with a number of improvements to facilities being made, making the areas more inviting and attractive to residents.

Doncaster parks

Ben Russell – Doncaster Council

Over recent years there’s been a closer working between the public health and parks and open spaces teams for the benefit of residents’ health.

Across Doncaster we have over 20 parks and hundreds of other open spaces that can all be used by everyone as places to get away from the daily grind and escape into greenery. We’ve got a wide variety of parks across the Borough, from parks close to the town centre, to Cusworth Hall and other country parks. There are lots of things to notice in our parks and seasonally the views and colours change, making every visit different to the last.

In July, four of Doncaster’s parks were awarded the Green Flag, an award given annually to the best parks in the UK. As a council we are also delivering a range of ongoing improvements to make our parks even more welcoming for residents: for example, earlier this year Elmfield Park benefitted from trial solar lights which have been installed to all of its main footpaths.

Parks not only provide a place to relax and enjoy time with friends and family, but also a great place to be active. In addition to walking routes we have free outdoor gyms for adults and playground facilities for children across a number of our parks.

“We’ve introduced more free gym equipment to our open spaces which are proving to be very popular.”

4

Green
Flag Parks

in the Borough:

Sandall Park, Quarry Park Local Nature Reserve,
Cusworth Park and Bentley Park

As we look to improve parks and open spaces further we’re intending to introduce more walking maps so people can understand more about the distances they’re walking and the number of steps they’re taking. In November Sandall Park also unveiled the latest playground in the Borough, a huge wooden play and adventure area that is unique in Doncaster. Sandall Park is also home to Doncaster’s weekly 5km Park Run which celebrated its 5th Anniversary on 22 September with an impressive 356 people taking part in just one day!

Improved mental wellbeing and reduced mental disorder are associated with:

 **better physical health**

 **longer life expectancy**

 **reduced inequalities**

 **healthier lifestyles**

 **improved social functioning**

 **better quality of life**

Conclusion and future recommendations

In conclusion I hope this report gives a flavour of how mental and physical health are both intrinsically linked: there is **no health without mental health**.

Recommendations for 2019

- 1

Create, improve and protect mental wellbeing using the five ways to wellbeing to harness the role of arts, culture and physical activity, promote social connections and contribute to inclusive economic growth and the reduction of health inequalities.
- 2

Doncaster Council and partners should sign the Prevention Concordat for Better Mental Health as an indication of support for the mental wellbeing of both Doncaster people and Doncaster employees.
- 3

Suicide is the biggest killer of men under 45 in the UK and today 16 people will take their own lives. That's why I'm keen that in Doncaster we pledge to become a zero suicide Borough and that we always ask twice when we're talking to people and asking about their mental health. This should be backed by rolling out Mental Health First Aid training across the Borough.
- 4

Continue to deliver mental health service improvements across the life course with service users as identified by Overview and Scrutiny reviews including:
 - a. improving the mental health of parents at the time of the birth of a new child
 - b. improving children and young people's mental health by responding quicker to all requests for support
 - c. improving responses to crisis including better use of peer support
 - d. reducing the need for and use of Out of Area placements
 - e. improve employment support for those with mental health issues to help them stay in work or return to work.

I'm keen to hear your views on this report.

Give every child the best start in life	3
Make good growth our watchword for economic development	4
Improve healthy life expectancy through preventing disabilities	5
Tackle unfairness and health inequalities	6

Give every child the best start in life

The first 1001 days (conception to second birthday) of a child’s life has lifelong effects on health, wellbeing, educational achievement and economic status.

The Doncaster Place Plan partners are developing a proposal for a consistent, sustainable and preventative integrated offer for the first 1001 days, which is locally available and strengthens family engagement as partners in securing the best start in life.

The effectiveness of Early Help was recognised in the January 2018 OFSTED inspection report. The number of children receiving Early Help continues to increase and, although multi-agency support has declined over the year, this is exceeded by the rate of growth in single agency work. However, re-referral rates into Early Help remain high. Work is being undertaken to explore this further.

Family Hubs are developing and all localities have a self-evaluation form which is updated four times a year. In the last year, judgements have moved from ‘requires improvement’ to ‘good’ as a result of the increased

participation of children and families. The integrated local offer working in and through Family Hubs focusses on health and development, employment support and children, family stability and supporting families with complex needs.

Healthy Learning Healthy Lives provides a framework and support for schools to work towards providing a health promoting environment for children. This includes specific criteria on providing a wide range of physically active opportunities.

There are over 30 primary schools providing the Daily Mile to children across Doncaster. Support and resources are available for any school to be able to deliver the Daily Mile to help embed physical activity into the day.

A Get Doncaster Moving ‘Active Schools’ group has been set up, to provide Borough-wide coordination and support for schools to increase and improve the quality of physical activity.

Make good growth our watchword for economic development

The council has developed a social value policy that was published in December 2018 in order to maximise the social value of the 'Doncaster pound'. This will be followed up with a practical social value toolkit to assist with the embedding of social value within the commissioning and procurement of works, goods and services.

The Better Working Futures (National Work and Health Programme) is fully operational across South Yorkshire and is delivered by Reed in Partnership. Working Win (Work and Health Unit Trial) is fully operational and delivered by the South Yorkshire Housing Association. Both these approaches are directed at those who are out of work and have a health condition, with Working Win also helping those in work but at risk of becoming unemployed through health issues. The Local Integration Board ensures activity is fully aligned and that system barriers can be overcome through partnership working across Doncaster.

The Be Well @ Work award will be launched in the new year to support businesses to improve and maintain the health of their workforce. This is currently being piloted across several South Yorkshire businesses. The new award will be supported with an online portal containing toolkits, template policies and guides to support employers on a number of issues including

mental health, sleep and absence management. A joint event with Public Health England is being organised on issues that employers face with employee wellbeing including mental health support to issues around appropriate use of fit notes and what can be done to address those barriers. Workshops are being offered to local employers on mental health/ stress awareness, resilience and sleep.

A men's health football tournament was held in summer 2018, with 18 teams entered from a number of workplaces across Doncaster. 144 men attended the event where a range of health promotion activity was provided addressing cancer awareness, physical activity, mental health and smoking cessation.

Since the launch of the council's energy company, Great North Energy (GNE), in November 2017, over 4,300 supplies have switched. A cheaper energy supply for these residents equates to at least £250,000 of savings. The promotion of GNE adds to a list of other services the council is able to support residents with. These include: The Public Health funded Boiler on Prescription scheme (also known as the Winter Warmth Project). The Neighbourhood Energy Action project; the Energy Company Obligation grant and a variety of support services the Energy Team is able to refer to via a proactive home visit approach.

Improve healthy life expectancy through preventing disabilities

The Doncaster Health and Wellbeing Board approved the prevention framework in September 2018 and this approach will be adopted by health and care partners.

Specific prevention work to address smoking in adults in contact with hospital services and making every contact count is being rolled out.

Get Doncaster Moving aims to help Doncaster's communities become healthier and more vibrant by increasing participation in physical activity and sport. In the past 12 months Doncaster has become one of 12 national Sport England Local Delivery Pilot sites to create innovative solutions that make it easier for people in our communities to become active. In addition we have developed a wide number of approaches including:

- Dance On aimed at providing easy dance sessions for women aged 60 and above.
- Sports Officer supporting local clubs and communities.
- Active Travel Officer to improve places to walk and cycle.
- Walking Officer to support communities to have walking opportunities for everyone.
- Active Dearne which will provide community champions and grants to support local people and organisations.

The Good Food Doncaster (GFD) Partnership is now established and Doncaster identified as a sustainable food city. Work has begun to address food insecurity, holiday hunger, food banks and vegetable box schemes/ sustainable food initiatives, particularly in relation to the town centre and wool market developments.

GFD includes people from Bentley Urban Farm, Jam Horse, the Real Junk Food Project, the Rotary Club, Flourish, Rotherham Doncaster and South Humber NHS Foundation Trust, Centre for Nutrition and Behaviour, VKN Digital, St Leger Homes, and the council. The sustainability of the partnership will be a key focus for 2019 in terms of charitable status and fundraising opportunities.

The council has incorporated controls on the increasing numbers of hot-food-takeaways and fast food outlets into the draft Doncaster Local Plan. New applications will be directed towards town, district and local centres and clustering of such premises should not undermine objectives to promote healthy living. Specific proposals relate to new planning applications within 400 metres of schools where the intention is to limit opening hours to after 5pm on weekdays with no over counter sales before that time.

The Food Enforcement Team continue to undertake inspections of existing takeaways and fast food outlets to ensure that they meet legislative requirements regarding food hygiene, labelling and composition, in particular that they comply with provisions relating to informing the public about allergens in food.

South Yorkshire Fire and Rescue are working with the council to consolidate and improve the Safe and Well referral scheme. This scheme identifies vulnerable residents who may be at an increased risk of accidental dwelling fire and provide them with a Home Safety Check and address any other concerns or support needs residents may have. In the last year 835 Safe and Well checks were completed, 223 of which resulted in onward referral. Following the successful introduction of the scheme in Doncaster, it is in the process of it being rolled out across all of South Yorkshire.

Tackle unfairness and health inequalities

The council has adopted health implications in all cabinet and council reports. Key areas of focus this year have been supporting developing a ‘healthy’ local plan and ensuring health elements are reflected in the ‘inclusive growth strategy’.

The Community Engagement Strategy was agreed by Cabinet in October 2018. This strategy sets out some key areas of focus for engagement, and where appropriate, co-design services with local people. The six areas of focus cover:

- Active Citizen Voice – we will develop one consistent approach to enable consultation with our communities that is easy to access, where gaps exist, we will identify opportunities for communities to engage with us through a variety of forums and we will improve our internal processes to ensure our community information is readily available and up to date.
- Supporting volunteering – we will support the potential that volunteering offers by promoting and supporting the vast number of people and local businesses that give up their time to make a difference in the community.
- Supporting the Voluntary, Community and Faith (VCF) sector - we will create a clear partnership position on support for the sector including funding advice, training opportunities, and infrastructure support, making it clear how this will take place and how other VCF organisations can access it.
- Opportunities for training and development - we will develop a training plan that will support Elected Members and staff to better understand their role in community engagement, particularly when undertaking consultation. The aim is to consistently support the effective use of tools and techniques.
- Embedding social value in what we do - we will ensure that we consider economic, social and environmental factors when we make decisions about the use of public money.
- Bringing people together through the use of our Community Assets – we will use our assets creatively to support local communities to improve their areas and bring people together.

A revised Joint Strategic Needs Assessment (JSNA) policy was agreed in September 2018 to establish a new approach with three component parts – Open data, commissioned deep dives and an annual state of health report. An integral part of this will be an online repository of published data and information to share insights and enable evidence based commissioning, design and decision making. This will be a significant move away from legacy ways of JSNA creation and publication in static PDF documents.

The council is also investing in rolling out its new Business Intelligence solution. This is taking a ‘start small and build’ approach so developments with this tool will be built over time, with an ambitious and broad pipeline of requests primarily initially focussing on areas of highest risk and impact.

The first part of the Black Asian and Minority Ethnic (BAME) health needs assessment work was reported in March 2017. Since then a number of focus groups have been held with local BAME residents and this identified a need to develop on-going engagement. A BAME health advisory group has been established and a three-year action plan proposed which emphasises building capacity, trust and communication networks.

The approach to identifying and understanding unequal access and outcomes to the Improving Access to Psychological Therapy service for our BAME residents has been developed. This work has led to service adaptations and we are in the process of rolling the method out to other areas.

I'm keen to hear your views on this report.

Doncaster Council

Report

Agenda Item No. 12
Date: 14 March 2019

**To the Chair and Members of the
HEALTH AND WELLBEING BOARD**

ANTI POVERTY UPDATE

EXECUTIVE SUMMARY

1. This report provides a summary of the work of the Anti Poverty Strategy Group for 2018. It also includes information in relation to the first update against the annual commitments made by Team Doncaster partner organisations which was formally signed at 5 June 2018 meeting together with case studies to show the benefits of joint working.

EXEMPT REPORT

2. This report is not exempt.

RECOMMENDATIONS

3. The Health and Wellbeing Board note the successes detailed within the report and the work of the Anti Poverty Group in its strategic approach to alleviating poverty across Doncaster.

WHAT DOES THIS MEAN FOR THE CITIZENS OF DONCASTER?

4. The Anti Poverty Strategy Group (APSG) leads to address the impact and cause of poverty through influence and action and supports the promotion of initiatives that tackle the causes of poverty with a wide range of partner organisations to improve the lives of the citizens of Doncaster.

BACKGROUND

5. APSG Successes
The 2018 priority for the APSG was to work to address welfare reform. Key highlights and achievements by the group include:-

- Agreeing the APSG priority for 2018 was to minimise the impact of welfare reform

www.doncaster.gov.uk

- Regular updates on Universal Credit and actions to reduce impact eg: the creation of 58 digital access points across the borough.
- Establishing the links between Good Food Alliance, Food Banks and Financial Inclusion Group.
- Action plan to reduce the fear of communities engaging with DWP.
- Reviewed draft outcomes from the Child Poverty Commission and discussed partner actions to address the issues from the 4 themes:-
 - Debt and benefits.
 - Jobs, work and skills.
 - Mental health.
 - Life transitions.
- BBC Children in Need Emergency Essentials Grant Programme being accessed by partner organisations.
- Working more closely with Credit Union after detailed presentation and raising its profile in our communities and organisations.
- Gambling Impact on Poverty Training Sessions.
- Reviewing APSG Action Plan.
- Reaching agreement with all partner organisations of Team Doncaster to prioritise actions to address the causes of poverty and sign up to 13 commitments.

Attendance at APSG meetings during 2018 remained variable which has led to some frustrations by some members of the group.

The APSG has identified the priority for 2019 to continue to be 'Addressing Welfare Reform'

Team Doncaster Commitment Statement

All the partner members of Team Doncaster signed up to a commitment statement, set out at appendix 1, to address poverty and the causes of poverty. The majority of Team Doncaster partners have provided an end of year update of actions they have taken against the Commitment Statement and this update was presented to last months meeting of the Team Doncaster partnership.

The responses evidence a significant amount of actions being undertaken by partners to address poverty and the cause of poverty which includes the following:-

SYFR

- Making referrals for those experiencing poverty so fuel and benefit checks can be completed.
- Supporting 80 volunteers / work placement, helping young people make career choices.
- Supporting the living wage.
- Established some foodbank collection points across a number of sites.

DONCASTER COLLEGE

- Financial Support policy ensuring students in financial hardship receive funding to access education and training.
- Revolutionary programmes in Traineeships to move into paid employment. Logistics and Construction with 70% success.

- 'Returning to Work' and 'Unemployed' courses are tailored to meet needs of the local communities.
- Credit Union actively implemented within College setting.

Doncaster CCG

- Data sharing enables commissioning decisions to be based on need and helps us target resources effectively.
- Established a Health Inequalities Working Group.
- Purchasing and structuring healthcare services for over 315,000 patients in Doncaster.
- Working more closely with Doncaster College to support our future workforce by promoting NHS Doncaster as a suitable career aspiration, showcasing the 350+ roles within the NHS.
- Promoting the use of social prescribing to help patients and families access appropriate advice.
- Collect for the Patient Focussed Group (PFG) foodbank.

Doncaster & Bassetlaw Teach Hospitals NHS Foundation Trust

- Ensure transport subsidies for patients are known and supported through systems for travel claims.
- Expand the availability of apprenticeships and work experience placements across the organisation and enter into partnership with Hall Cross Academy.
- Temporary worker Healthcare Assistants training scheme in conjunction with NHS Professionals.
- Provide access to affordable credit to staff employed by the organisation.

DMBC

- Highlight health inequality implications within Corporate Reports.
- Public Health commission Changing Lives Healthy Living Service to deliver accredited ESOL training for BME women in Doncaster.
- Education, training and employment support and advice provided to Aspire clients.
- Commission 2 year community based adult literacy programme targeting families.
- Targeted fuel poverty work (Affordable Warmth Programme) in areas of highest fuel poverty.
- Target NHS health checks service in areas of deprivation as identified in 2018 inequalities audit.

Department of Work and Pensions

- Sharing information relating to UC rollout and updates for partner organisations to plan for effects.
- Job fairs hosted at JCP and elsewhere.
- 29 work experience placements have been hosted at JCP since April 2018.
- Participating with the local network and cascading information locally within the partnership.
- Have personal budgeting support on site.

Chamber of Commerce

- C1,400 businesses received business support of some description in 2018.
- C7,000 young people supported by Doncaster Skills Academy.
- Enterprise support made available to all communities free of charge.
- Led campaign to open Doncaster University Technical College.
- Getting the green light for Doncaster UTC (which will be 'best in class' for employer links).
- Brilliant work to support the town centre being delivered by partners in response to raising business concerns.
- C£5,000 raised to support Doncaster charities including Real Help town centre cause.
- Health related services (i.e. Westfield) available to Doncaster workers via Chamber membership (paid for by the employer / member).
- Delivering 250 events for the local business community.

Doncaster Children's Trust

- Parents experiencing worklessness are supported to access appropriate education, training or employment.
- Preparation for independence programme created for children in care and Care Leavers (Key to my Future) which teaches young people a range of independent living skills including good personal financial management skills.
- Children and families are supported financially to access all services without exception.
- Has a well-developed apprenticeship scheme which covers business support, social work and participation and advocacy, as well as a graduate volunteer scheme which supports newly graduated young people to gain valuable work experience.

St Leger Homes

- Creation of Tenancy Sustainment Team and 686 tenants supported to help sustain their tenancies.
- Reviewed Income Collection Policy.
- Recruited 14 apprentices.
- Close working with DWP including trialling staff working in the Job Centre.
- 1 tonne of food collected for our customers at Christmas for Doncaster foodbanks.
- Established "Garage 32" furniture recycling scheme in partnership with Public Health.
- Agreed process to address barriers for complex lives who have no ID and cannot access rehousing.

Case Studies

1. Garage 32 Recycling Scheme

A feasibility study was undertaken on whether St Leger Homes could set up a project around waste management which had the potential to not only reduce the number of skips that were being used but also to utilise usable furniture that would benefit tenants with minimal income and assist with sustainable tenancies for both new and existing tenancies.

The pilot started in November 2017 and is currently still running in the South West Neighbourhood area.

The initial scope for the pilot was for the St Leger Homes Caretakers to assess furniture and white goods when they were undertaking void clearances. They were to take any reusable items to a number of garages in Denaby for storage, the first garage used was no 32. Estates Officers involved in the pilot organised the items and distributed them as and when they identified tenants that were in need of support during the viewing and sign-up process, with some existing tenants identified through day to day contact.

White goods recovered from void properties were also stored as well as furniture. However the team were unable to distribute the white goods until the goods had passed a PAT (Portable Appliance Test).

Public Health (Well Doncaster Team) became involved with the project at an early stage by funding repairs, security locks and paying for the training of an estates officer to become a qualified portable appliance tester (PAT), the latter enabling white goods to be distributed.

Colleagues in Public Health (Well Doncaster) are extremely supportive of this initiative, enabling them to deliver against their Healthy Homes strategy and offered a secondment, for 12 months, to one of our pilot project staff to take the scheme borough wide.

Joint metrics and KPIs will be established to monitor success; this will be a joint task for St leger Homes and Public Health. The scheme will include wider links to initiatives such as Stronger families and support re-housing of homeless citizens. So far over 70 tenants have been supported through the scheme.

This scheme will help address one of the two of the most important things we can do to improve a person's health. One is to support them in good employment and the second a healthy home. The physical condition of the home and the living experience has a significant impact on the health and wellbeing of individuals and our community.

Poor housing conditions increase the risk of severe ill-health or disability by up to 25 per cent during childhood and early adulthood (Shelter, 2006) According to Marmot ('Fair Society, Healthy Lives, 2010) people living in the poorest neighbourhoods in England will on average die seven years earlier than people living in the richest neighbourhoods.

Health inequalities arise from a complex interaction of many factors - housing, income, education, social isolation, disability - all of which are strongly affected by one's economic and social status.

Health inequalities are largely preventable. Not only is there a strong social justice case for addressing health inequalities, there is also a pressing economic case. It is estimated that the annual cost of health inequalities is between £36 billion to £40 billion through lost taxes, welfare payments and costs to the NHS.

By expanding the scheme across the Borough in a 12 month pilot we hope we have helped address some health inequalities in housing and to provide more sustainable homes whilst delivering against SLHDs environmental objectives.

2. The BBC Children in Need Emergency Grants Programme

In November 2018 the APSG received a presentation regarding Children in Need emergency grants fund. The fund aims to provide grant items that meet children and young peoples' most basic needs or are critical to their wellbeing. It supports children and young people who are facing exceptionally difficult circumstances.

The fund can deliver or fund critical items such as:

- Gas or electric cookers
- Essential household items
- Furniture and kitchen equipment
- Children's beds and bedding
- Washing machines
- Fridges and freezers
- Baby equipment
- Clothing in exceptional or emergency situations

The grant is a referrer only programme and the agency administering the grant work with as many organisations as possible in order to reach the families who are eligible for the grant.

Members of the APSG have registered as referrer agencies and grants have been achieved for beds, bedding, white goods and clothing.

Appendix 1 – Team Doncaster Commitment Statement

This page is intentionally left blank

“DONCASTER WORKING TOGETHER TO REDUCE POVERTY IN OUR BOROUGH”

Our principles for action:

We will:

- 1) Work together using an intelligence led approach to tackle Poverty in everything we do, including policy, and service delivery.
- 2) Minimise disadvantage to those experiencing, or at risk of, poverty through our decision making.
- 3) Work to change situations where poverty is a barrier to the receipt of services.
- 4) Promote opportunities to improve education and skills for all.
- 5) Attract better paid jobs to Doncaster so that poverty does not become a barrier to opportunity and achievement.
- 6) Offer apprenticeships, training, volunteering opportunities and work experience placements to help people become work ready.
- 7) Ensure there are appropriate support mechanisms in place to help those people who are furthest away from being work ready
- 8) Work together to plan and deliver appropriate, accessible advice and support to those experiencing, or at risk of, poverty.
- 9) Work with, listen to and support our communities to develop a culture of independence regardless of age or circumstance
- 10) Promote and support the health and wellbeing of people experiencing or at risk of poverty.
- 11) Work to promote the awareness of poverty and the impacts and reduce the stigma associated with being affected by poverty.
- 12) Reduce the extent of financial exclusion through the promotion of the living wage and access to affordable credit.
- 13) Promote the commitment to local procurement in order to maximise the impact of the Doncaster Pound.

Glyn Jones, Deputy Mayor:

“It is in all our interests to ensure Doncaster is a thriving and ambitious town. We want the best for our communities and we want to see investment and growth which positively impacts all of us. We have been working on tackling poverty for many years but we now need everyone to help and so we invite others to join our quest to improve the lives of all people in Doncaster and to ensure that those who are at risk of or are already experiencing poverty are not left behind or impacted upon negatively”

The priority this year is to help those affected by welfare reforms.
