To whom it may concern

I wish to object to the opening of the brewery/public house and allowing live music to be played from 1000hrs to 2300hrs and midnight on occasions at Cusworth Hall and Park.

There are a number of areas that I wish to object

1. There has been a lack of consultation and notices for residents of Cusworth village in regards the impact the opening of a public house on Cusworth village and surrounding area.
2. The opening of the brewery/public house and with request to allow live music inside and out until midnight will increase the noise pollution from the live music as well as people leaving the brewery/public house and visitors will have to walk through the village, it is bad enough now with groups of youths passing at all times.
3. The increase in litter pollution due to the increase in park uses.
4. A detrimental effect on the environment due to the increase use of cars to travel to the venue.
5. Cusworth hall managers/staff have been trying to reduce the use of the car park from youths who use it as a race track, sell drugs and play music on their car radios outside the stated opening times of the hall and park. This has been achieved by locking up the car park usually around 1900hrs to 2100hrs. If the car park is still being locked up at the time above customers will park there cars either in Cusworth village, or as they do regularly on Cusworth lane/Back lane. The village is not designed for a large number of vehicles parking possibly preventing access to emergency vehicles if they are required.
6. There is a lack of regulation at Cusworth hall and park in surrounding areas as young adults drink and take drugs regularly within the park grounds.
7. Literature has been published at Cusworth hall and park stating there is a brewery/public house will be opening, is this a forgone conclusion that the brewery/public house is opening and selling ales to members of the public? How can this be as objections/concerns need to be submitted by the 6th June.
8. There is already a public house open within half a mile of Cusworth hall and park.
9. Cusworth Hal and park is an area where rare wildlife is flourishing and the opening of the brewery/public house could affect the attraction of other wildlife.
10. Doncaster Metropolitan Borough Council is encouraging people of Doncaster to get fit and be healthier with the introduction o walking for health walks around Cusworth hall and park does the opening of a brewery/public house encourage people to take up the health walks?

Cusworth is in a conservation area and as it states on your own website changes within the conservation area should have the character or appearance which is desirable to preserve or enhance the area it sits opening a brewery/public house doesn't

Please consider the points above when the hearing for the license

Yours faithfully
David Scully
Resident of Cusworth Village
