27th July 2020

Dear Kate,

Sound Proofing Works to Party Wall

Following your request for further information regarding the sound proofing I can confirm the following,

On 17th June 2020 the party wall between your shop and the next door neighbours to the front first floor room was double boarded with two layers of 15mm sound block plasterboard prior to having a skim coat applied. The perimeter of all boards and the board joint were thoroughly filled with adhesive to achieve the best sound reduction possible.

I attach a photograph showing the wall with plasterboards applied.

If you have any further queries please let me know,

Yours sincerely,

[Redacted signature]
