<b>How will this contribute to improving health and wellbeing in Doncaster?</b>
<p>With a growing and ageing population and reducing resource, dementia will continue to be one of the biggest challenges for health and social care and communities as a whole. As a result the Health and Wellbeing board see dementia as a priority and much has been achieved over the last 12 to 18 months however there is much more still to do if people with dementia and their families living in Doncaster are to live well and remain active and empowered to be in control of their health and wellbeing. Professor Alistair Burns, the National Clinical Director for dementia has been invited to Doncaster on the back of recent partnership success and will present how Health and Wellbeing Boards can drive, support and assist further improvements.</p>

## **Recommendations**

The Board is asked to:-

- Note the information and recommendations presented by Professor Burns
- Take part in discussions through questions and queries as appropriate.
- Make recommendations for the Integrated lead and team to action as appropriate.
