

Extracts from the Department for Transport document ‘Statutory Taxi & Private Hire Vehicle Standards’ (July 2020)

- 1.1 There is evidence to support the view that taxis and private hire vehicles are a high-risk environment. In terms of risks to passengers, this can be seen in abuse and exploitation of children and vulnerable adults facilitated and in some cases perpetrated by the trade and the number of sexual crimes reported which involve taxi and private hire vehicle drivers. Links between the trade and child sexual abuse and exploitation have been established in many areas and other investigations continue. Data on reported sexual assaults by taxi and private hire vehicle drivers evidence the risk to passengers; data from [Greater Manchester](#) and [Merseyside](#) suggest that, if similar offence patterns are applied across England, 623 sexual assaults per year are reported. These figures do not however account for the under reporting of crime which is estimated to be as high as 83 percent in the [Crime Survey for England and Wales](#).
- 1.2 The Policing and Crime Act 2017 enables the Secretary of State for Transport to issue statutory guidance on exercising taxi and private hire vehicle licensing functions to protect children and vulnerable individuals who are over 18 from harm when using these services. For the purposes of this document, a child is defined as anyone who has not yet reached their 18th birthday; and the term “vulnerable individual” has the same meaning as the definition of a ‘vulnerable adult’ for the purpose of section 42 of the [Care Act 2014](#), which applies where a local authority has reasonable cause to suspect that an adult in its area (whether or not ordinarily resident there):
- (a) has needs for care and support (whether or not the authority is meeting any of those needs),
 - (b) is experiencing, or is at risk of, abuse or neglect, and
 - (c) as a result of those needs is unable to protect himself or herself against the abuse or neglect or the risk of it.
- 1.3 Whilst the focus of the Statutory Taxi and Private Hire Vehicle Standards is on protecting children and vulnerable adults, all passengers will benefit from the recommendations contained in it. There is consensus that common core minimum standards are required to regulate better the taxi and private hire vehicle sector, and the recommendations in this document are the result of detailed discussion with the trade, regulators and safety campaign groups. **The Department therefore expects these recommendations to be implemented unless there is a compelling local reason not to.**

- 1.4 It should be noted that as policing and criminal justice is not a devolved matter, the Statutory Taxi and Private Hire Vehicle Standards issued under the Policing and Crime Act 2017 will continue to have effect in Wales although responsibility for taxi and private hire vehicle policy was devolved to the Welsh Assembly in April 2018. Should the Welsh Government introduce legislation to regulate on these issues, the standards in this document would, cease to apply.
- 1.5 All local authorities and district councils that provide children's and other types of services, including licensing authorities, have a statutory duty to make arrangements to ensure that their functions and any services that they contract out to others are discharged having regard to the need to safeguard and promote the welfare of children. This means that licensing authorities should have in place arrangements that reflect the importance of safeguarding and promoting the welfare of children. This includes clear whistleblowing procedures, safe recruitment practices and clear policies for dealing with allegations against people who work with children, as set out in the [Working Together to Safeguard Children](#) statutory guidance.
- 1.6 The Statutory Taxi and Private Hire Vehicle Standards reflect the significant changes in the industry and lessons learned from experiences in local areas since the 2010 version of the Department's Best Practice Guidance. This includes extensive advice on checking the suitability of individuals and operators to be licensed; safeguarding children and vulnerable adults; the Immigration Act 2016 and Common Law Police Disclosure (which replaced the Notifiable Occupations Scheme).
- 1.7 The standards in this document replace relevant sections of the Best Practice Guidance issued by the Department in 2010, where there is a conflict between the Statutory Taxi and Private Hire Vehicle Standards and the Best Practice Guidance the Department issue on taxi and private hire vehicle licensing, the standards in this document take precedence.
- 4.33 In terms of investigating complaints CCTV footage of an incident can provide an invaluable insight, providing an 'independent witness' to an event. This can assist in the decision whether to suspend or revoke a licence.

In-vehicle visual and audio recording – CCTV

- 7.7 Government has acknowledged the potential risk to public safety when passengers travel in taxis and private hire vehicles. It is unfortunately the case that no matter how complete the information available to licensing authorities is when assessing whether to issue any taxi or private hire vehicle licence, nor how robust the policies in place are and the rigor with which they are applied, it will never completely remove the possibility of harm to passengers by drivers.

- 7.8 The Department's view is that CCTV can provide additional deterrence to prevent this and investigative value when it does. The use of CCTV can provide a safer environment for the benefit of taxi/private hire vehicle passengers and drivers by:
- deterring and preventing the occurrence of crime;
 - reducing the fear of crime;
 - assisting the police in investigating incidents of crime;
 - assisting insurance companies in investigating motor vehicle accidents.
- 7.9 All licensing authorities should consult to identify if there are local circumstances which indicate that the installation of CCTV in vehicles would have either a positive or an adverse net effect on the safety of taxi and private hire vehicle users, including children or vulnerable adults, and taking into account potential privacy issues.
- 7.10 While only a small minority of licensing authorities have so far mandated all vehicles to be fitted with CCTV systems, the experience of those authorities that have has been positive for both passengers and drivers. In addition, the evidential benefits of CCTV may increase the level of reporting of sexual offences. According to the Crime Survey for England and Wales only 17 percent of victims report their experiences to the police, 28 percent of rape or sexual assault victims indicated that a fear they would not be believed as a factor in them not reporting the crime. The evidential benefits CCTV could provide are therefore an important factor when considering CCTV in vehicles.
- 7.11 The mandating of CCTV in vehicles may deter people from seeking a taxi or private hire vehicle licence with the intent of causing harm. Those that gain a licence and consider perpetrating an opportunistic attack against a vulnerable unaccompanied passenger may be deterred from doing so. It is however unfortunately the case that offences may still occur even with CCTV operating.
- 7.12 CCTV systems that are able to record audio as well as visual data may also help the early identification of drivers that exhibit inappropriate behaviour toward passengers. Audio recording should be both overt (i.e. all parties should be aware when recordings are being made) and targeted (i.e. only when passengers (or drivers) consider it necessary). The recording of audio should be used to provide an objective record of events such as disputes or inappropriate behaviour and must not be continuously active by default and should recognise the need for privacy of passengers' private conversations between themselves. Activation of the audio recording capability of a system might be instigated when either the passenger or driver operates a switch or button.
- 7.13 Imposition of a blanket requirement to attach CCTV as a condition to a licence is likely to give rise to concerns about the proportionality of such an approach

and will therefore require an appropriately strong justification and must be kept under regular review. More information and guidance on assessing the impacts of CCTV and on an authority mandating CCTV is annexed to this document (Annex – CCTV guidance).

Annex – CCTV Guidance

It is important to note that, in most circumstances, a licensing authority which mandates the installation of CCTV systems in taxis and private hire vehicles will be responsible for the data – the data controller. It is important that data controllers fully consider concerns regarding privacy and licensing authorities should consider how systems are configured, should they mandate CCTV (with or without audio recording). For example, vehicles may not be exclusively used for business, also serving as a car for personal use - it should therefore be possible to manually switch the system off (both audio and visual recording) when not being used for hire. Authorities should consider the Information Commissioner's view on this matter that, in most cases, a requirement for continuous operation is unlikely to be fair and lawful processing of personal data.

The Home Office 'Surveillance Camera Code of Practice' advises that government is fully supportive of the use of overt surveillance cameras in a public place whenever that use is:

- in pursuit of a legitimate aim;
- necessary to meet a pressing need;
- proportionate;
- effective, and;
- compliant with any relevant legal obligations

The Code also sets out 12 guiding principles which, as a 'relevant authority' under section 33(5) of the Protection of Freedoms Act 2012, licensing authorities must have regard to. It must be noted that, where a licence is granted subject to CCTV system conditions, the licensing authority assumes the role and responsibility of 'System Operator'. The role requires consideration of all guiding principles in this code. The failure to comply with these principles may be detrimental to the use of CCTV evidence in court as this may be raised within disclosure to the Crown Prosecution Service and may be taken into account.

The Surveillance Camera Commissioner (SCC) has provided guidance on the Surveillance Camera Code of Practice in its 'Passport to Compliance' which provides guidance on the necessary stages when planning, implementing and operating a surveillance camera system to ensure it complies with the code. The Information Commissioner's Office (ICO) has also published a code of practice which, in this context, focuses on the data governance requirement associated with the use of CCTV such as data retention and disposal, which it is important to follow in order to comply with the data protection principles. The SCC provides a self-assessment tool to assist operators to ensure compliance with the principles set of in the Surveillance Camera Code of Practice. The SCC also operate a certification scheme; authorities

that obtain this accreditation are able to clearly demonstrate that their systems conform to the SCC's best practice and are fully compliant with the Code and increase public confidence that any risks to their privacy have been fully considered and mitigated.

The Data Protection Act 2018 regulates the use of personal data. Part 2 of the Data Protection Act applies to the general processing of personal data, and references and supplements the General Data Protection Regulation. Licensing authorities, as data controllers, must comply with all relevant aspects of data protection law. Particular attention should be paid to the rights of individuals which include the right to be informed, of access and to erasure. The ICO has provided detailed guidance on how data controllers can ensure compliance with these.

It is a further requirement of data protection law that before implementing a proposal that is likely to result in a high risk to the rights and freedoms of people, an impact assessment on the protection of personal data shall be carried out. The ICO recommends in guidance that if there is any doubt as to whether a Data Protection Impact Assessment (DPIA) is required one should be conducted to ensure compliance and encourage best practice. A DPIA will also help to assess properly the anticipated benefits of installing CCTV (to passengers and drivers) and the associated privacy risks; these risks might be mitigated by having appropriate privacy information and signage, secure storage and access controls, retention policies, training for staff how to use the system, etc.

It is essential to ensure that all recordings made are secure and can only be accessed by those with legitimate grounds to do so. This would normally be the police if investigating an alleged crime or the licensing authority if investigating a complaint or data access request. Encryption of the recording to which the licensing authority, acting as the data controller, holds the key, mitigates this issue and protects against theft of the vehicle or device. It is one of the guiding principles of data protection legislation, that personal data (including in this context, CCTV recordings and other potentially sensitive passenger information) is handled securely in a way that 'ensures appropriate security', including protection against unauthorised or unlawful processing and against accidental loss, destruction or damage, using appropriate technical or organisational measures.

All passengers must be made fully aware if CCTV is operating in a vehicle. Given that audio recording is considered to be more privacy intrusive, it is even more important that individuals are fully aware and limited only to occasions when passengers (or drivers) consider it necessary. The recording of audio should be used to provide an objective record of events such as disputes or inappropriate behaviour and must not be continuously active by default and should recognise the need for privacy of passengers' private conversations between themselves. Activation of the audio recording capability of a system might be instigated when either the passenger or driver operates a switch or button. As well as clear signage in vehicles, information on booking systems should be introduced. This might be text on a

website, scripts or automated messages on telephone systems; the Information Commissioner's Office (ICO) has issued guidance on privacy information and the right to be informed on its website.
