**How will this contribute to improving health and wellbeing in Doncaster?**

As previously communicated, Doncaster's Health and Wellbeing Strategy is overdue and requires an update to reflect the significant events and changes that have taken place since its completion in 2016.

CDC & Doncaster ICB are collaborating on a comprehensive and integrated approach to addressing the health and wellbeing challenges in Doncaster. This will include the co-production of:

- a 5-year plan for Health and Care across Doncaster

- a new Health and Wellbeing Strategy

We are taking a joint approach with the development of the 1 Doncaster 5-year plan to ensure that they are aligned and complement one another. Since our last update we have been working together to collate and analyse relevant data, insight, and evidence to inform the development of a set of draft priorities and delivery plans.

Furthermore, following a recent informal HWBB workshop to discuss how the Health and wellbeing Board might effectively respond to and absorb the recommendations of the Fairness and Wellbeing Commission, it was agreed that that a separate development session to consider the future priorities and governance arrangements of the board would be a timely exercise to undertake to ensure that the board evolves in a way that allows for a greater focus on the key things that will have the greatest impact.

With the agreement of the Chair of the Health and wellbeing Board, a development session is planned for Friday 9 February 2024 and will consider the draft priorities of the health and wellbeing strategy and the future governance arrangements of the board. Work to prepare for this session is underway.

### **Recommendations**

The Board is asked to note the verbal update, endorse the proposals for the additional Development session to be held on Friday 9<sup>th</sup> February 24 and commit to attending the session to ensure the session is useful in its purpose.
